ELECTRICAL INSTRUCTIONS & CONDITIONS

HOW TO CALCULATE YOUR ELECTRICAL REQUIREMENTS:

1. To order power for your lights, take the wattage on the bulb and multiply by the number of lights you are using.
2. For equipment, you may place your order by reading the rating plate on each individual piece of equipment. A separate outlet should be ordered for each piece of equipment as well as each location you require power. Rating plates are located on all pieces of electrical equipment and will indicate wattage, amperage or horsepower, voltage and phasing.
3. Dedicated outlets require a minimum 20 amp outlet and are double the price.

WHERE YOUR OUTLET WILL BE LOCATED IN YOUR BOOTH:

1. Your power will be installed in one location as indicated in the following diagrams, typically outlets will be placed on the floor in the back of the booth.
2. If power is required in locations other than those indicated below, secondary distribution will be billed on a time and material basis.
3. If a location for power in island booths is not provided prior to show move-in, or if repositioning is requested, you will be charged time & material for installation of main power as well as secondary distribution.

OTHER:

1. **Labor is required for:** positioning, all under-carpet distribution of electrical wiring, all overhead distribution of electrical wiring, including coaxial cable, fiber optics, CAT5, etc. and the distribution of same from product to booth and from booth to booth, installation of lighting, electrical equipment, lighted signs, etc., when the combination of all outlets is greater than 20 amps or voltage is higher than 120 volts, for inspection of exhibitors power panels and equipment prewired to plug into our system. Billing will be done on a time and material basis. Please see Electrical Labor Order Form to place your order.
2. All material and equipment provided by Freeman Electrical Services is for rental purposes only and remains the property of Freeman Electrical Services. The provisions will be removed at the close of the show.
3. All equipment regardless of power source, must comply with Federal, State, and local codes. Freeman Electrical Services reserves the right to inspect all electrical devices and connections to ensure compliance with all codes. Freeman Electrical Services is required to refuse connections where the exhibitor wiring is not in accordance with local electrical code.
4. Standard wall and other permanent building utility outlets or sockets are not part of booth space and may not be used by exhibitors unless electrical services have been ordered.
5. Exhibitors' cords must be a minimum of 14 gauge 3 wire with ground and must be flat when used for floor-work. All multi-outlet devices shall have circuit protection. All exposed non-current carrying metal parts of fixed equipment, which are liable to be energized, shall be grounded.
6. Exhibitors' equipment will be modified to conform to Freeman Electrical Service's cord caps and will be billed on a time and material basis.
7. Exhibitors with hardwall displays must arrange for power to be dropped inside the booth or provide access.
8. Power sharing is not permitted between exhibitors.
